Executive Summary – UK Top 50 Market Analysis

Objective

Understand the structure of the UK Top 50 playlist through artist diversity, concentration, collaborations, explicit content, release format and track duration.

Headline Metrics

- Cleaned entries: 27,750
- Unique artist credits: 363
- Average unique artist labels per day: 39.0
- Collaboration ratio: 18.4%
- Explicit content share: 32.0%
- Album share: 60.0%
- Single share: 39.7%
- Average track duration: 3.29 minutes

Business Use

The dashboard provides a simple way to compare market structure across dates and filters. It can support UK-focused artist development, marketing and release planning when used with additional business data.

Important Limitation

The supplied dataset has no artist nationality field. Domestic versus international classification should only be added from a separate verified artist-origin source.
